SCIENCE OF LIFE - Reel 9 .

The Fly as a Disease Carrier.✓

Remarkable photo-micrographs dealing with the structure of the house fly, especially its feet, proboscis and crop as related to the distribution of bacteria; the fly's breeding and feeding habits, with special relation to spread of disease; also life history, and practical suggestions toward extermination. Venereal diseases; need of courageous discussion of their causes, consequences and prevention. Source of information on disease prevention.

This document is from the Library of Congress  
“Motion Picture Copyright Descriptions Collection,  
1912-1977”

Collections Summary:

The Motion Picture Copyright Descriptions Collection, Class L and Class M, consists of forms, abstracts, plot summaries, dialogue and continuity scripts, press kits, publicity and other material, submitted for the purpose of enabling descriptive cataloging for motion picture photoplays registered with the United States Copyright Office under Class L and Class M from 1912-1977.
